

Dear Sirs,

I am appalled by Sinclair Broadcasting's decision to air an anti-Kerry propaganda piece that is filled with lies days before the election. This constitutes flagrant abuse of the the privilege granted for them to use the public airwaves. Monopoloziation and consolidation of the media in the hands of the few is clearly endangering freedom of speech and our form of government by bombarding the public with propaganda and lies that are not in the best interests of the people of our community. We cannot have a representative form of government if the citizens are not told what's going on in their city, state, country and in the rest of the world -- instead being given misinformation and censored news to further a political and corporate agenda.

I am requesting that their FCC license be revoked as they have proven themselves unworthy of this public trust.
